Benefits

Dose

Notes

Foliar application products

liquid NPK, with aminoacids quick assimilation

Improves the growth of crops and anti-stress.

2-3 L/Ha

Prevents and corrects trace elements deficiencies, with double protection: Chelated and complexed (EDTA + LG).

During first crop stages, mainly vegetative developing.

100 Gr/HL

NPK complex fertilizer with high , Magnesium, land trace-elements content.

The most efficient and complete feeding.

1-3 kg/HL

Solid fertilization

NPK complex organo-mineral fertilizer with high Organic Matter, for ecologic cultivation

The most efficient and complete feeding.

400-600 Kg/Ha

Complex NPK fertilizer with Magnesium, Sulphur and microelements. Low chloride. With ActiBión Technology.

Balanced, complete and effective feeding

400-600 Kg/Ha

Animal and plant Organic NPK fertilizer with Iron (Fe).

Improves soil Organic Matter level.

600-1000 Kg/Ha

Products to be applied by irrigation

organic physio-stimulant rich on quick assimilation free amino acids +humic acids

Improves the growth of crops and anti-stress.

2-3 L/Ha

Humic and fulvic acid to improve soil structure

soil improve structure.

8-10 L/Ha

Prevents and corrects trace elements deficiencies, with double protection: Chelated and complexed (EDTA + LG).

correct trace elements deficiency

1-2 Kg/Ha per week

Special water soluble NPK fertilizer with macro and micro elements and rich in Algavital Complex.

Double effect: Feeds and bio-stimulates crops.

Depending on necessities.
